DETAILED ACTION

Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose an apparatus and method for providing a transposed signal where an input signal is filtered through a parallel bank of L filters, the outputs of which are downsampled to produce complex-valued subband signals, phase-angles of the complex-valued subband signals are multiplied by M, a subset of the real parts of the product are upsampled and filtered with a parallel bank of L' filters, which are added to the input signal to produce the transposed signal, where the impulse responses of the filter banks are shown in both of claims 1 and 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
